

## MC WALL

A system used to design modern curtain walls whose shapes are simple and complex.

Mullion-transom visual width: 55 mm .

The curtain wall in the MC Wall system consists of mullions and transoms fastened by stainless steel bolts. There are $2 \times \varnothing 6$ stainless steel fasteners per joint; the fasteners ensure very high load capacity of the mullion-transom connection, both in the wind pressure plane and the infill load plane. The solution does not prevent using traditional transom brackets or fastening transoms only with screws attached from the face side.

A wide range of mullions and transoms suitable for static requirements.

The insulators can be built accordingly to the infill thickness.

Application of vapour-proof and breather membranes on the perimeter of the facade is easier, in accordance with new guidelines for installation of aluminium structures.

A wide range of decorative cover caps makes it possible to obtain varied visual effects on the curtain wall.

The system is a basis for facade structures: MC PASSIVE, MC PASSIVE+, MC GLASS and MC FIRE.

The option of bending profiles (detailed specification of profiles and detailed technical parameters of profile bending process are available in the customer area of the website www.aliplast.pl).

A wide range of colours available - RAL palette, structural colours, Aliplast Wood Colour Effect, bi-colour.

TECHNICAL SPECIFICATION

| SYSTEM | MATERIAL | DEPTH MULLION | DEPTH <br> TRANSOM |  | GLAZING RANGE | MULLIONS RIGIDTY | TRANSOM RIGIDITY |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| MC WALL | aluminium | $10-326 \mathrm{~mm} / 10-294 \mathrm{~mm} /{ }^{\text {/ }}$-59 mm |  |  |  | from 2,5-4092 cm4* | from 0,9-1831,1* |

* There is a possibility to use additional reinforcements.

PERFORMANCE

| SYSTEM | THERMALINSULATION Uf * | AIR PERMEABILTTY | WINDLOAD RESISTANCE | WATERTIGHTNESS |
| :---: | :---: | :---: | :---: | :---: |
| MC WALL | Uf from $0,84 \mathrm{~W} / \mathrm{m}^{2} \mathrm{~K}$ | Class AE 1500; EN 12152 | 2600 Pa $\pm 3900$ Pa <br> EN $13116: 2004$ | Class RE1950; EN 12154 |

[^0]
[^0]:    * Thermal insulation is dependent on a combination of profiles and thickness of the filling.
